Any other important information thath you would like to add

I'm the first scaffold with BMAC user in Malaysia in 2010 and have been doing more than 250 cases of scaffold with cells surgeries with good consistent results. Anika Therapeutics' used my second look regenerated cartilage post scaffold surgery to promote their scaffold during their investor meeting. Sandy Hovercraft of Anika Therapeutics will testify my resume. Most importantly my belief in cartilage regeneration surgery is in line with that of ICRS and I believe I can be a torch bearer for ICRS in this region. If my application was accepted , my hospital will be the first ICRS Centre in the Asia Pacific region and this will bring tremendous benefit to cartilage surgery enthusiast who wants to learn about cartilage surgeries old and new.
