

SPONSORSHIP OPPORTUNITIES 2026

*Advancing Science & Education of the Prevention
& Treatment of Cartilage Disease Worldwide*

Dear Industry Partners,

At the International Cartilage Regeneration & Joint Preservation Society (ICRS), we are committed to advancing the science and education of cartilage disease prevention and treatment on a global scale. Collaboration between clinicians, scientists and industry is integral to achieving this shared objective. As a key industry stakeholder, we invite you to consider partnering with the ICRS on our various initiatives, where your support will be crucial in pushing the boundaries of medical knowledge and practice.

Why Partner with Us?

- **Brand Visibility:** Gain exposure to a wide, diverse audience through our events, publications & digital platforms.
- **Networking Opportunities:** Connect with KOLs, professionals & decision-makers in the cartilage regeneration & joint preservation sector.
- **Positive Public Relations:** Enhance your corporate image by associating with a reputable and impactful nonprofit organisation and meet your and CSR / ESG targets.
- **Customised Recognition:** Benefit from tailored sponsorship packages designed to meet your specific marketing goals.

The following pages showcase a range of attractive and affordable sponsorship opportunities tailored to various interests and contribution levels.

Your engagement can make a significant impact and advance our mission. We anticipate a rewarding, mutually beneficial collaboration and look forward to connecting with you in person at our 2026 educational events.

Thank you and kind regards,

Daniel A. Grande, PhD

President, International Cartilage Regeneration & Joint Preservation Society (ICRS)

ADVANCING SCIENCE & EDUCATION OF THE PREVENTION & TREATMENT OF CARTILAGE DISEASE WORLDWIDE

Founded in 1997 in Switzerland, the ICRS is the main forum for international collaboration in cartilaginous tissue research. Recognizing that there is a continuum from cartilage injury to degenerative joint disease, we bring together basic scientists, clinical researchers, physicians, and industry members engaged or interested in articular biology, its genetic basis and regenerative medicine. We seek to improve our patients' quality of life, decrease their disability and reduce the impact of degenerative joint disease on healthcare systems worldwide.

We invite all companies whose technologies can diagnose, rehabilitate, repair, protect or regenerate cartilaginous surfaces of joints (stem cells, growth factors, PRP, bioactive composites, synthetics, scaffolds, allografts and combinations of thereof) to join us as partners and sponsors.
